REPLACEMENT WINDOWS AND DOORS

# From Our Family to Yours

*Extending Trust with the Marvin® Name*

## *A different kind of company*

Nearly a century of innovation and uncompromising product performance standards: that's the legacy of Marvin Windows and Doors. We are a family-owned company that has always believed in using the finest materials to create exceptional products, then backing them up with first-rate service.

As a result, our windows and doors have earned a solid reputation for superior quality, fine craftsmanship, and long-lasting performance.

The bottom line is customers trust the Marvin name because it means a quality product backed by service.

Today, third- and fourth-generation Marvins remain actively involved in the company and continue a strong commitment to our customers, communities, employees, and products.

Recognizing a need for non-wood replacement windows for discerning homeowners like you, Marvin created *Infinity*®, a revolutionary line of replacement products developed with the expertise of an industry leader.

*"Thank you for considering Infinity from Marvin for your replacement project. We take pride in producing the highest-quality, longest-lasting windows and doors and providing you a simple, hassle-free replacement experience."*

# Infinity<sup>®</sup> from Marvin<sup>®</sup>

*Building on Decades of Experience*

## *An idea is born*

The origin of *Infinity from Marvin* came from a simple idea: Marvin had a long history of making some of the very best wood and wood/clad windows and doors available. Why not introduce a non-wood product line that is low-maintenance and offers superior appearance and performance?

Marvin has used Ultrex<sup>®</sup> fiberglass components since the early 1990s, and recognized its superior characteristics of low-maintenance, durability, strength, and energy efficiency.

So the idea was developed further; Marvin took designers with decades of experience and asked them to design a window line specifically for your replacement project needs. The line would combine low-maintenance Ultrex fiberglass with the look of traditional windows, and be made in custom sizes and options for every replacement project need.

Finally, Marvin decided that the line should be presented to the market by professional replacement experts who handle the entire process seamlessly from initial consultation all the way through installation. Simple and hassle free for you.

And so an idea was born... *Infinity from Marvin*.

*The Infinity team takes pride in producing the highest quality replacement windows and doors. In addition to being long-lasting and energy-efficient, all Infinity products are assembled in the U.S.A.*

## *Why over 50,000 satisfied homeowners prefer Infinity Replacement Windows*

- 1 Weathertight — provides year-round comfort wherever you live.
- 2 Super Durable Ultrex® — the ideal window material means virtually no maintenance for you.
- 3 Energy Efficient — ENERGY STAR® qualified products mean you can save money.
- 4 Better Looking — thoughtful design and traditional detailing not found in other replacement windows.
- 5 No-hassle shopping experience — from a reputable local installing retailer.
- 6 Easy to Clean — advanced designs make cleaning worries a thing of the past.
- 7 Limited Lifetime Warranty — brings you peace of mind.
- 8 Founded by Marvin® Windows and Doors — an industry leader for nearly a century.

# Our Hassle-Free Experience

*An Unmatched Experience with the Experts*

*Infinity*® makes your entire replacement window and door project simple and hassle-free. In fact, our independent *Infinity* retailers offer a one-stop shopping experience, providing knowledgeable expertise from initial consultation all the way through full-service delivery and installation.

## *Infinity's* simple 4-step process

- 1 A local expert will give you a thorough in-home consultation or showroom tour of *Infinity* products and services.

- 2 A window professional will measure your existing windows and doors for accurate replacement specification.

- 3 You'll then receive a detailed project quote that you can review with your retailer and have all your questions answered.

- 4 Removal of your old windows and doors is followed by convenient and professional installation of your custom replacement windows and a thorough clean-up of the area.

Best of all, you'll have peace of mind with the *Infinity* Limited Lifetime Warranty.

“At WindowPRO, we appreciate our relationship with *Infinity* because we are both family owned and operated businesses. We share the same commitment to our customers, communities, and employees.”

Jake Zahnow  
WindowPRO  
Cleveland, OH

## *Our local experts make a difference*

*Infinity from Marvin*® independent retailers are hand selected for their expertise and decades of experience in your local market. *Infinity* retailers live and work in your communities, and will treat you like a neighbor.

Benefits of working with your local *Infinity* retailer:

- Many *Infinity* retailers are local, family-run enterprises that give back to your community. Their reputation and future business rely on your 100% satisfaction.
- *Infinity* retailers have decades of experience in your market. They understand your unique local codes, requirements, and installation needs.
- If the need arises, you can often speak directly to the retailer’s owner.
- *Infinity* retailers create good jobs and support your local economy.
- *Infinity* retailers are available to support the Limited Lifetime Warranty should the need arise.

# Installation Options

*The Best Fit for Your Home*

“Our *Infinity* retailer handled the entire process for us from start to finish. It was truly hassle-free.”

Lee & Ray D.

Depending on the age and style of your home, *Infinity*® offers two window replacement methods. Both methods are designed for maximum efficiency and minimal disruption to your home.

## Option 1: Insert replacement

This replacement method is used when your existing window frames are in good condition, but the sash need replacement. Our frame-in-frame insert design is installed into your existing window frame with no disruption to existing trim, interior walls, or exterior siding.

This method is fast, efficient, more economical, and there is no finishing required on your part.

## Option 2: Full-frame replacement

This installation method is appropriate when your entire window has deteriorated and needs replacement or if you are looking for a totally new window size, style, or appearance. With full-frame replacement, the entire window (sash, frame, and casing) is removed and replaced.

## *Built for life*™

Every *Infinity* product is backed by the *Infinity* Limited Lifetime Warranty. It's our pledge to you that we will stand behind our products for as long as you own them.

For full details on our Limited Lifetime Warranty, see [infinitywindows.com](http://infinitywindows.com).

“After we replaced our windows with *Infinity*, our utility bill was so low the utility company came by our house because they were sure our meter was broken!”

Randy & Lynn S.

“With *Infinity from Marvin*® I got everything I wanted... low maintenance fiberglass, easy cleaning features, and even more daylight and better views. I wish every decision was this easy.” Kathy B.

# Ultrex® Fiberglass

*Our Superior Material*

ULTREX FIBERGLASS IS  
**8X STRONGER** THAN VINYL  
AND ONE SQUARE INCH CAN  
SUPPORT 34,000 POUNDS!\*

## *Ultrex fiberglass — a superior material*

*Infinity*® replacement windows and doors are made from Ultrex fiberglass — a pultruded fiberglass material so strong and durable it is superior to other window materials. Best of all, it makes *Infinity* products virtually maintenance free.

### Created for strength and beauty

Our patented process starts with strong cables of glass that are saturated with specially compounded resins, pulled through a heated die, and cut with diamond-edge blades. Below are the steps Ultrex goes through from forming and curing all the way to the cutting stage. All of these steps create a remarkably durable material that outlasts and outperforms other window materials.

# 38%

FIBERGLASS WINDOWS HAVE  
A **38% LONGER** USEFUL LIFE  
EXPECTANCY THAN VINYL.\*\*

### Advantages of Ultrex fiberglass

- Low maintenance
- Base material is silica sand — an abundant natural resource
- Intricate profiles replicate the look of traditional wood windows
- Low expansion provides easy operation for the life of the window
- Strength keeps windows square and true
- Narrow profiles allow for more visible glass area and expanded views
- Long-term stability reduces the risk of seal failures and air leakage through the window
- Patented, mechanically bonded inline acrylic finish is up to 3x thicker than competitive finishes, providing superior resistance to discoloring, scratching, and denting

\* Stiffness of the material to perform as designed. This stiffness is the flexural modulus of the material and is expressed in pounds per square inch.

\*\* "Life cycle assessment of windows for the North American residential market: Case study" by the University of British Columbia. Scandinavian Journal of Forest Research, 2008.

# Ultrex® Strength

*The Strongest Choice for Window and Door Replacement*

## Durability for a lifetime

Ultrex is as strong as low carbon steel and 8x stronger than vinyl. It's so tough, we have to use diamond-edge blades just to cut it to size. The strength of Ultrex translates into superior stability, long-term ease of operation, low-maintenance, and superior performance.

## Strength for an expanded view

Take a moment to look at the images below. The *Infinity* view is expanded — how? The superior strength of Ultrex also allows for a narrower window frame profile and more glass area than other replacement windows, giving you more daylight and better views.

*The view through vinyl replacement windows*

*The view through Infinity replacement windows*

# Ultrex<sup>®</sup> Performance

*Durable and Low Maintenance*

Nothing holds true like Ultrex fiberglass from 350°F to -30°F

Cold, heat and time — no worries

Ultrex resists the ravages of cold, heat, time and pressure to provide the most worry-free windows and doors available today. While vinyl can distort in extreme heat or streak and crack in fluctuating temperatures, *Infinity*<sup>®</sup> products offer the highest level of performance and are virtually maintenance-free.

Low thermal expansion means a stronger seal

Comparison of expansion and contraction

Ultrex has an extremely low thermal expansion rate, which keeps the window stable and weathertight, reducing the risk of seal failures and air leakage into your home.

Tired of windows that are difficult to operate?

*The low expansion of Ultrex means Infinity Windows resist sticking, swelling, and warping, providing easy operation for the life of the window.*

Tired of high-maintenance windows?

*The low expansion of Ultrex means Infinity's patented finish stays looking like new and is virtually maintenance free. It resists discoloring, warping, rotting, corrosion, denting, rust and doesn't require sanding, scraping, or painting.*

# Ultrex<sup>®</sup> Appearance

*Superior Design with a Superior Finish*

## Better looking inside and out

Our nearly 20 years of experience with Ultrex allows us to create products with intricate details. Drawing on the decades of experience from Marvin<sup>®</sup> Windows and Doors, Infinity products incorporate the details of traditional wood windows without the maintenance.

## The difference is in the details

Vinyl windows can arrive with messy welded corners, and bulky profiles that reduce your view. *Infinity* windows arrive with clean mechanically-bonded corners, traditional details, and narrow profiles to maximize your view.

*Vinyl Competitor*

*Infinity*

## A superior finish that outlasts the competition

Our patented, mechanically bonded finish is up to 3x thicker than competitive finishes. It provides superior resistance to scratching and UV degradation - even on darker colors.

*Fiberglass Competitor*

*Infinity*

*Fiberglass Competitor*

*Infinity*

*Infinity* uses a patented, mechanically-bonded finish, compared to competitors' thin painted finish that can expose the rough fiberglass material.

*The automobile industry learned decades ago that acrylic lights outlast the life of their vehicles. Infinity uses a similar acrylic finish to provide long-term color retention and durability.*

# Energy Efficiency

*Technology Brings Cool Savings*

*Summer sun is filtered and reflected back outdoors.*

*In the winter, indoor heat is reflected back into the home.*

*Infinity*® products have one of the highest performance ratings from the National Fenestration Rating Council (NFRC), the organization that defines energy performance ratings for the window and door industry.

## *Energy Efficient, Sustainable Design*

Ultrex® fiberglass is far less thermally conductive than aluminum (500x less!) and insulates much like wood. This means that Ultrex provides an insulated barrier against extreme weather temperatures, keeping your home comfortable, and helping to reduce heating and cooling costs.

### Glazing Options

We know how important energy efficiency is, and our standard LoE<sup>2</sup>-272® glazings are a simple means of maximizing your home's thermal efficiency. LoE<sup>2</sup>-272® reflects heat back to its source so summer heat is reflected outdoors and winter indoor heating is retained. At the same time, up to 84% of the sun's UV rays are screened to reduce fading and damage to upholstery and carpets. Argon gas and a warm edge spacer are also standard features.\*

Our optional LoE<sup>3</sup>-366® glass provides increased performance, especially in high sun exposure locations. This top-performance glass is formulated to reject solar heat while letting light in. With LoE<sup>3</sup>-366® glass, light and visibility are maximized, up to 95% of the sun's damaging UV rays are blocked, and most importantly, you and your home stay cool and comfortable year round.

### Sustainable design and an investment that pays

*Ultrex is made predominately of silica sand, a safe and abundant natural resource.*

*Our facilities eliminate 95% or more of VOCs (Volatile Organic Compounds).*

\* Exceptions are made for high elevation applications.

# 30%

*Infinity Windows with LoE glazing can reduce your heating and cooling bills by up to 30%.\**

*The glass in Infinity products contain 22%-29% recycled content, and Ultrex requires less embodied energy to produce than vinyl.*

*Infinity products meet ENERGY STAR® standards and are Hallmark certified.*

*Fiberglass windows have a 38% longer useful life expectancy than vinyl\*\**

*New windows can increase the resale value if you decide to sell your home.*

\* Estimated savings are based on data set forth in the Window Selection Tool of the Efficient Windows Collaborative, available at <http://www.efficientwindows.org>.

Actual savings will vary by product type, location, method of installation, individual home characteristics, local climate and conditions, utility rates, and other factors.

\*\* "Life cycle assessment of windows for the North American residential market: Case study" by the University of British Columbia. Scandinavian Journal of Forest Research, 2008.

# EverWood® Engineered Finish

*The Beauty of Wood. The Ease of EverWood.*

## HAVE A MOISTURE PROBLEM?

EverWood is inorganic and moisture resistant\*, so it requires virtually no maintenance.

Now you can enjoy the natural appearance of wood without all the maintenance. EverWood is an *Infinity*®-exclusive wood grain interior finish that can be stained to match your existing woodwork. It looks and feels like real wood, but doesn't require the sanding, scraping, or refinishing of wood.

## Durable and low maintenance

Long-lasting EverWood is made from an inorganic material, so it won't absorb moisture or decay over time. That means there's virtually no warping, discoloration, material degradation, expansion, or contraction — just remarkably reliable performance and lasting beauty, year after year.

Together, EverWood and Ultrex® offer the ultimate in beautifully superior, low-maintenance replacement windows and doors.

## Stains just like wood

In a few easy steps, this remarkable engineered wood grain finish takes stain just like wood. Thanks to its extreme durability, you'll enjoy the rich, natural look of wood for years to come.

*Mahogany Stain  
on Natural Wood*

*Mahogany Stain  
on EverWood*

\* Submerged product photo is used for dramatic purposes only. EverWood is a moisture-resistant finish that is applied to *Infinity* products and does not make the product waterproof or prevent condensation. *Infinity* products should never be submerged in water.

## *Stain to match*

EverWood® samples are provided with every window and make it easy to test for the right match. Now you can perfectly complement your home's existing woodwork with the warmth and beauty of EverWood.

REPLACEMENT WINDOWS

# Features and Options

*Making Your Replacement Windows and Doors Feel Like Home*

## PAINT TO MATCH

You can paint *Infinity* products to match exterior colors without affecting the protective performance of the Ultrex fiberglass substrate.

## Exterior color options

The exterior of *Infinity*® windows come standard in Stone White. Sierra, Cashmere, Pebble Gray, Bahama Brown, and Bronze are available as options. The Ultrex® fiberglass exterior finish is virtually impermeable and helps protect your windows from the effects of wind, weather, and time.

Plus, you can paint *Infinity* products to match exterior colors without affecting the protective performance of the Ultrex fiberglass substrate.

*Stone White*

*Sierra*

*Cashmere*

*Pebble Gray*

*Bahama Brown*

*Bronze*

## GLASS OPTIONS

Standard LoE<sup>2</sup>-272° and optional LoE<sup>3</sup>-366° glass are also offered tempered, obscure and tempered obscure.

*Obscure glass for added privacy*

## Interior color options

The interior of *Infinity* windows come standard in Stone White with Sierra and EverWood® available as options. EverWood, our unique engineered wood grain finish, provides the rich appearance of wood, yet is low-maintenance for years of lasting beauty. Durable EverWood can be easily stained to match the color of your home's existing woodwork.

*Stone White*

*Sierra*

*EverWood*

## Six great hardware finishes

Customize the look of *Infinity* windows with a variety of hardware finish options.

## Screen options

With just one glance through our Hi Transparency screen, you'll be amazed at what you see - and what you won't. The tighter, finer mesh of the Hi Transparency screen provides a clearer, brighter view without the distortion and haziness that are often experienced with traditional screens.

*Hi Transparency Screen*

*Standard Screen*

## CORNER KEYS

Corner keys keep window units square through delivery, installation, and years in your home. You won't find unsightly, messy welded corners — we inject adhesive sealant in the sash corners to help make joints solid, square, and weathertight.

## FINISHING TOUCHES

Brick Mould Casing is available to add a traditional look to the exterior.

# Grilles and Divided Lites

## *Pattern Options for a Custom Look*

*Grilles-Between-the-Glass*

With *Infinity*® from Marvin®, there is no such thing as a minor detail. We pay close attention to every aspect of our windows. So choose an option that complements the personality of your home. We'll take care of the details.

### Grilles-Between-the-Glass

*Infinity* windows are available with contoured grille bars between the panes of glass. Grille bars facing the exterior match the window exterior color, and grille bars facing the interior are available in Stone White, Sierra, Satin Taupe and Bronze. Grilles-Between-the-Glass combine easy glass cleaning with the stunning detail of a grille pattern. It's the best of both worlds.

*Simulated-Divided-Lites*

### Simulated-Divided-Lites

Choose Simulated-Divided-Lites for an authentic divided glass look. Simulated-Divided-Lite bars are permanently adhered to the exterior surfaces of the glass with a spacer bar between the panes of glass. Exterior Simulated-Divided-Lite bars are made of the same tough Ultrex® fiberglass used on all *Infinity* exteriors. Interior bars are available in Stone White, Sierra or stainable EverWood® to match your existing woodwork.

### Divided Lite Patterns

Various divided lite patterns are available to replicate the look of your original windows or to add architectural interest.

*Standard Rectangular*

*Rectangular 1-High*

*Cottage 1-High*

*Standard Rectangular*

*Cottage 1-High*

*Standard Rectangular*

*Prairie 6-Lite*

*Prairie 9-Lite*

*Prairie 6-Lite*

*Prairie 4-Lite*

Additional divided lite patterns are available.

Every home is as unique as its owner. With *Infinity's* Divided Lite options you can let your personality shine.

# Double Hung

## *The smart replacement choice*

You've heard it said, "Don't work harder. Work smarter." With old Double Hung windows, you can work up a sweat just opening them and keeping them open. The *Infinity*® Double Hung is the smart answer to a traditional favorite. You'll be amazed at its smooth, effortless operation. Quality hardware and advanced design result in a Double Hung that is easy to clean from the interior of your home. Make the smart window choice and your "window worries" will become a thing of the past.

## Easy tilt operation

Our Double Hung window is amazingly simple to operate. Both lower and upper sash tilt easily without removing your screens. Our unique tilt release button lets you tilt the lower sash using only one hand, so cleaning is easier than ever.

*Unlock and raise the sash slightly.*

*Press the tilt release button and slide the lock lever over the button.*

*Tilt the sash into the room for easy cleaning without screen removal.*

*Cottage Style  
Double Hung*

*Oriel Style  
Double Hung*

Sash of different proportions in one unit, commonly called Cottage Style and Oriel Style, are also available with all the tilting and performance features of a regular *Infinity* Double Hung.

With a matching picture unit available, the *Infinity* Double Hung provides a high performance replacement solution for every view in your home.

# Casement and Awning

## *A versatile, user-friendly replacement option*

One word describes *Infinity*® from *Marvin*® Casements and Awnings — easy. They are easy to choose, easy to operate and easy to love. The Casement (left- or right-hinged) and Awning (top-hinged) combine beauty and virtually effortless operation. The standard Easy Wash® hinge is just that — a design that lets you easily clean the window both inside and out. The optional Clear View® hinge provides for an optimal viewing area. Both Casements and Awnings feature folding handles that tuck conveniently out of the way of most window treatments and provide a clean, finished look.

Casement

*An unobtrusive single lock lever simultaneously activates both locks.*

*The handle turns effortlessly and folds down neatly out of the way.*

Available in a variety of multiple assembly options

*The Easy Wash hinge creates an opening for easy cleaning from the interior of your home.\**

*The Clear View hinge option keeps the sash tight to the frame allowing for maximum visibility.\**

EverWood®, the interior wood grain finish from *Infinity*, is now available on Casement and Awning screens. Have the look of wood-framed screens that are stained to match your interior trim without the maintenance of wood!

\* Easy Wash® and Clear View® hinges are not available on Awning (top hinged) windows. Clear View hinge availability is based on window width.

*Infinity* Casements and Awnings incorporate effortless operation and functionality with a multi-point locking system.

# Glider

## *A smooth operating space-saver*

*The operating sash slides effortlessly and can be removed and reinstalled for easy cleaning.*

If your gliders don't "glide" anymore or you have a space where a swinging sash would be in the way, the *Infinity*® Glider is the perfect solution. These durable, energy-efficient windows operate smoothly and seal tightly against air and water infiltration. Made with tough, dependable Ultrex® fiberglass inside and out, our Gliders are virtually maintenance-free. You'll also appreciate the superior performance and energy efficiency provided by standard LoE<sup>2</sup>-272® with argon insulating glass. Cleaning the glass is simple with tilt latches that allow you to remove the operable sash for easy access.

Available in various operations

*Choose left-operating or right-operating sash.*

*Triple-sash units are available with operating sash on both ends.*

This versatile *Infinity* Glider is the ideal answer when you're looking for simple operation, energy efficiency and reliable performance.

**INFINITY**  
from **MARVIN**  
REPLACEMENT WINDOWS

# Round Top

*A strong improvement to your view.*

Whether you are looking to add visual interest to a room or simply replacing an old window, *Infinity*<sup>®</sup> Round Tops are a stunning addition to any space. Adding a half-round above a standard window instantly adds light and style to your home.

As always, the elegance of your new *Infinity* Round Top will be complemented by incomparable durability.

The *Infinity* Round Top is a traditional favorite that adds architectural detail and style to your home.

Grilles-Between-the-Glass (GBG) patterns are available in open and closed hub sunbursts:

Add elegance and individuality to your home by complementing windows with an *Infinity* Round Top.

# Polygon and Picture Windows

## *Style and Substance*

A dramatic improvement to any living space — *Infinity*® Polygons are shaped to the architecture of your home. Open views and abundant natural light are achieved in a variety of styles from stand-alone picture windows that span up to 10 feet, to geometric combinations that follow the slope of your roof. Available in a variety of shapes including rectangles, pentagons, trapezoids and triangles, *Infinity* Polygons accentuate the design defining that special room in your home.
