

MARVIN CONTEMPORARY

A VIEW FOR PEOPLE WHO ALREADY HAVE A VISION.

The beautiful thing about contemporary design is the way it embodies timeless truths: that air and light may be the greatest luxuries of all, that less isn't just more, it's the essence of sustainability. And that style isn't about impressing others but about expressing yourself.

Marvin® Windows and Doors joins strong lines, an approachable aesthetic and natural materials for a contemporary residential or commercial environment that's not just beautiful, but livable. Combining highly durable, infinitely recyclable aluminum with the natural warmth of wood, a renewable resource, and the latest glazing technologies, Marvin delivers environmentally responsible, high performance products that meet or exceed ENERGY STAR® guidelines.

An inspired contemporary vision is both beautiful and sustainable. Let us help you to realize yours.

MARVIN® WINDOWS: CLEAN LINES. BOLD STATEMENTS.

Each Marvin window is distinctive, but they share some substantial qualities. The designs are streamlined and can fit a contemporary feel. Large expanses of glass take in the most impressive views. And performance is simply exceptional.

Marvin has an almost limitless selection of options to enhance the contemporary look. See Marvin.com for details.

ULTIMATE CASEMENT & AWNING / ULTIMATE REPLACEMENT CASEMENT & AWNING

Casement windows make the view the star. Their sizes are generous, up to 24 square feet. Revolutionary minimal hardware streamlines sight lines. Perfect for use in 90 degree corner windows. Additional options – narrow frames, square sticking and retractable screens – keep lines open and profiles clean. Like all Marvin® Windows, our Casements and Awnings deliver exceptional ease of use, energy efficiency and strength.

VENTING PICTURE WINDOW

Because it opens straight out, the Venting Picture Window ingeniously optimizes your view, gently lets in air on all sides and enhances security with limited sash travel-giving an open window the appearance of being closed.

CORNER WINDOW

Corners pose special challenges – which our corner windows elegantly solve. Our factory supplied mulling system creates clean lines – there are no exposed fasteners, the stops match and you can stack windows above and below for an even grander view.

ULTIMATE GLIDER

Sometimes details tell a story, like the innovative, ergonomic hardware or the proprietary sash removal system for easy cleaning. Fine details combine with expanses of glass – assemblies as large as 10' by 6' – to deliver a beautiful window. The same attention to design delivers superior performance.

DIRECT GLAZE / POLYGONS

When you minimize the frame, you maximize the light – especially when you combine polygons in distinctive combinations. Make a sleek, bold, assured statement.

DOORS WITH DISTINCTION.

Frame a view, make an entrance, and open up your world with Marvin® doors. Anything but ordinary, you'll never feel the same walking through a doorway again.

Contemporary door options include hardware from Valli & Valli, crafted by famous designers and Italian artisans. See Marvin.com for details.

LIFT AND SLIDE

With openings up to a panoramic 47 feet, the Lift and Slide ensures that almost nothing separates the comfort of your home from the beauty of the landscape. Even the hardware blends into the background. On the interior, an exclusive flush mount handle flows into the stile edge. Outside is nothing but clean sight lines with minimal hardware. Some options to keep in mind are square sticking for reduced shadow lines at daylight opening and a High Performance Sill.

BI-FOLD

Bring the view to you with a breath-taking 21-foot opening to the outdoors. Complement the scene with our contemporary Architectural Hardware options. Our Bi-Fold Doors should open the imagination for a dramatic connection with outdoor living spaces, expand a room into adjoining interior areas – and more.

INSWING / OUTSWING

There are good reasons these are among our most popular doors – style, energy-efficiency, ease of use – and they're available with details that complement your aesthetic, including Valli & Valli door hardware.

SLIDING PATIO DOOR

By combining narrow stiles and panels that span up to four feet, the sliding patio door lets you fully enjoy the available light. And the hardware is as impressive as the door. Take a look at the Nobilus options, especially the rectangular escutcheons and varied pulls. The High Performance Low Profile Sill is ADA compliant and lets you move effortlessly from exterior to interior.
